

MD-500: Single Device, Single Platform

With the MD-500, you can receive assignments, perform pre-, in-process and post-scans, access over 1,000 dynamic calibration routines, take photos, write estimates, link directly to OEM repair procedures, order parts, and upload standardized scan and calibration reports.

Improve efficiency with scan times under 60 seconds (for most vehicles)

Perform dynamic and static calibrations (with the MD-TS21)

Get access to Google Play Store, extended battery life, improved camera quality and more

AASP members receive \$350 off the MD-500, the all-in-one solution for diagnostic scanning, calibration, estimating and blueprinting.
